

PRESS RELEASE

H2 Equity Partners invests in Amberon Traffic Management to support growth

H2 Equity Partners is pleased to announce its sixth investment by Fund V: the acquisition of Amberon - the UK's leading low-speed traffic management service provider.

Amberon, founded in 2002 and headquartered in Paignton, Devon, has grown rapidly to become the market leader in low-speed traffic management with national coverage. The company is able to provide a full-service offering to its clients: high speed traffic management, low speed traffic management as well as barrier repair and installation services.

The company generates c£37.5 million sales and operates out of 24 depots across England and Wales. Amberon is extremely well positioned to further expand its depot network, expand its portfolio of services and provide both high speed and low speed traffic management services to clients in England and Wales.

The Amberon group employs over 500 people and places safety at the centre of everything it does. The company has a full portfolio of safety accreditations and effectively utilises technology throughout the business to maintain the highest safety standards.

Management, led by Terry Musson and Dan East, and H2 Equity Partners expect to accelerate the growth of the group as we drive to become the UK's largest and best-in-class provider of full-service traffic management solutions.
